

Curriculum for Excellence - Substance Misuse Education

Level 3 Framework

Introduction

Curriculum for Excellence has an important role to play in promoting the health and wellbeing of children and young people and of all in the educational establishments to which they belong.

What are the main purposes of learning in health and wellbeing?

Learning in health and wellbeing ensures that children and young people develop the knowledge and understanding, skills, capabilities and attributes which they need for mental, emotional, social and physical wellbeing now and in the future. Learning through health and wellbeing enables children and young people to:

- make informed decisions in order to improve their mental, emotional, social and physical wellbeing
- experience challenge and enjoyment
- experience positive aspects of healthy living and activity for themselves
- apply their mental, emotional, social and physical skills to pursue a healthy lifestyle
- make a successful move to the next stage of education or work
- establish a pattern of health and wellbeing which will be sustained into adult life, and which will help to promote the health and wellbeing of the next generation of Scottish children.

How is does substance misuse education fit into the health and wellbeing framework?

The framework begins by describing features of the environment for learning which will support and nurture the health and wellbeing of children and young people, including a positive ethos and relationships, and participation in activities which promote a healthy lifestyle. These statements are intended to help to inform planning and practice within establishments or clusters and also by individual practitioners.

The statements of experiences and outcomes are then structured into the following organisers:

- Mental, emotional, social and physical wellbeing
- Planning for choices and changes
- Physical education, physical activity and sport
- Food and health
- **Substance misuse**
- Relationships, sexual health and parenthood.

Some aspects of health and wellbeing are the ‘responsibility of all’ in schools. Substance misuse is not the responsibility of all but other aspects of HWB have a significant contribution to learning in substance misuse e.g. mental, emotional, social and physical wellbeing organiser and the relationships aspect of the relationships, sexual health and parenthood organiser. The health and wellbeing experiences and outcomes are designed to encourage links with all other areas of the curriculum, to reinforce learning and to provide relevant, enjoyable and active experiences.

The health and wellbeing experiences and outcomes provide valuable opportunities to develop skills in literacy and numeracy.

Participation in expressive arts activities can make an important contribution to a child’s or young person’s sense of wellbeing and can bring learning to life. Using the expressive arts as a medium for learning, for example through role play, can engage learners in issues such as bullying, in more engaging and accessible ways.

There are clear connections between science and several aspects of health and wellbeing e.g. between the social studies and the aspects relating to citizenship and participation.

In all of these cases staff have the scope to group experiences and outcomes together in different and imaginative ways which enrich, consolidate and enhance progression in learning.

Curriculum for Excellence encourages interdisciplinary learning across curricular areas. Effective interdisciplinary learning:

- can take the form of individual one-off projects or longer courses of study
- is planned around clear purposes
- is based upon experiences and outcomes drawn from different curriculum areas or subjects within them
- ensures progression in skills and in knowledge and understanding
- can provide opportunities for mixed stage learning which is interest based.

What is the purpose of substance misuse education?

Substance misuse education should be part of a broad curriculum which supports the promotion of positive and healthy lifestyle choices. It should give children and young people accurate and credible information about a variety of substances, whoever facilitates the classroom activity. It should meet the needs of individual pupils, acknowledging that all children and young people have different experiences. Children and young people should gain knowledge of substances and their effects and learn and practice skills for decision making and coping strategies around risk taking behaviour.

What do we mean by ‘substances’?

Learners develop their understanding of the use and misuse of a variety of substances including over the counter and prescribed medicines, alcohol, illegal drugs, tobacco and solvents.

Planning in partnership

Children and young people's learning in health and wellbeing benefits strongly from close involvement with children and young people and their parents or carers and partnership between teachers and colleagues such as home link staff, health professional, educational psychologists, police and local voluntary organisations. Partners can make complementary contributions through their specialist expertise and knowledge. Effective partnership working:

- engages the active support of parents and carers
- reinforces work across transitions and planning across sectors
- maximises the contribution of the wider community
- draws upon specialist expertise
- ensures, through careful planning and briefing, that all contributions come together in ways which achieve coherence and progression

Key partnerships

Partnerships will vary in every establishment and should meet the needs of children and young people. They might include:

Within school	Local partners	National partners
----------------------	-----------------------	--------------------------

<p>pupils parents and carers all school staff local authority officers community members active schools co-ordinators</p>	<p>youth and community workers leisure coaches police fire and rescue service coastguard alcohol and drug partnerships children's reporter social work local employers local media voluntary organisations child and adolescent mental health services NHS</p>	<p>Learning and Teaching Scotland Scottish Government HMle NHS Health Scotland Scottish Crime and Drug Enforcement Agency Re-solve Alcohol Focus Scotland Young Scot Scottish Prison Service Scottish Association of Care and Rehabilitation of offenders</p>
--	--	--

Important factors to consider when planning substance misuse education

The following factors should be considered when thinking about substance misuse education:

- Whole school approach to health and wellbeing, substance misuse is part of this
- Links with other risk taking behaviour
- Achievement
- Substances
- Building on consistent messages throughout school life
- Messages relevant to all children and young people
- Messages which take account of local circumstances
- Opportunities for children and young people to make, and practice making decisions
- Support for those children and young people who are affected by substance misuse, either parental or their own
- Values, attitudes and beliefs
- Myths and stereotypes
- Poly drug use
- Links with other policies e.g. child protection and management of incidents

- Protective factors based on evidence
- Influences on children and young people e.g. media, popular culture, peer pressure
- Evaluation of programmes
- CPD for staff
- Induction/Probationer training

Level 3 Substance Misuse Framework

Building on the successful work of Choices for Life (web link) the Scottish Government has prioritised taking the key messages used within this programme to the young people in S1 and S2. (more to be added here about Choices and Get Real)

The following framework provides those working with S1 and S2 pupils some guidance on how to link their programme of activity with other health and wellbeing organisers and other curricular areas. It should not be seen as prescriptive and is certainly not exhaustive.

<u>Substance Misuse Experiences and Outcomes (Level 3)</u>	<u>Links to other Health and Wellbeing Experiences and Outcomes</u>	<u>Curricular Areas that could contribute</u>	<u>Ideas and Opportunities to Develop Learning</u>

<p>I understand the positive effects that some substances can have on the mind and body but I am also aware of the negative and serious physical, mental, emotional, social and legal consequences of the misuse of substances.</p> <p>HWB 3-38a</p>	<p>Mental Emotional Social and Physical Wellbeing I am developing my understanding of the human body and can use this knowledge to maintain and improve my wellbeing and health.</p> <p><i>*Responsibility of all</i></p> <p>HWB 3-15a</p>	<p>Expressive arts Having developed ideas from a range of stimuli, I can contribute to devising, rehearsing and presenting drama or scripts.</p> <p>EXA 3-14a</p> <p>Sciences I have explored how the body defends itself against disease and can describe how vaccines can provide protection.</p> <p>SCN 3-13c</p>	<ul style="list-style-type: none"> ● Medicines - the science of medicine, the effects on the human body and the testing regime ● Legal and Responsible Use of Alcohol - Discussion ● Safety, welfare and personal risk - the consequences of using illegal and legal substances ● Physiological effects on the body ● Emphasis on coping and stress management ● Facts and Myths ● Legal and illegal substances defined ● Creatively exploring the effect of illegal substances based on real life case studies
