Y-STEP (Young People Smoking Tobacco Education and Training) have produced these resources in response to a need from schools for up-to-date, relevant materials to support this aspect of health and wellbeing in the curriculum, particularly for levels 2 and 3.

The resources and materials that Y-STEP have developed to offer creative and flexible ways to enable teachers and youth workers to deliver Health and Wellbeing experiences and outcomes within a curriculum for excellence around substance misuse. They will give all pupils, from P6-S3 an opportunity to build knowledge and skills and to explore and reflect on attitudes and values which will help them to make decisions around smoking and their own health and wellbeing.

The Y-STEP programme is also supported by a range of additional materials that are available to borrow free from a number of libraries around Edinburgh, schools and libraries in Midlothian, *East Lothian and community organisations in West Lothian to promote discussion around tobacco and smoking.

The responses to these resources and materials from pilot schools have been very positive and I know that they will make a welcome contribution for all teachers in developing and planning lessons around substance misuse.

Kath Stewart
Development Officer for Health and Wellbeing, City of Edinburgh Council

YSTEP Smoking Prevention Materials are available to borrow for free from:

The YSTEP (Young People Tobacco Education and Prevention) Project is a partnership between Fast Forward, West Lothian Drug and Alcohol Service (WLDAS) and NHS Lothian, working with schools, youth agencies and young people to take forward the priorities for young people in the Scottish Government’s Smoking Prevention Action Plan 2008-2012. YSTEP is funded until September 2011.

The action plan, ‘Scotland’s Future is Smoke Free,’ aims to limit the attractiveness, availability and affordability of cigarettes in the interests of reducing the prevalence of young people smoking in Scotland.

YSTEP project staff from Fast Forward (City of Edinburgh; Midlothian and East Lothian) and WLDAS (West Lothian) seek to support groups to develop a ‘whole-organisation’ approach to smoking prevention by providing free:

- Flexibly-timed smoking prevention training and capacity building for staff, peer educators and volunteers working with young people
- Opportunities for young people to plan and develop their own smoking prevention initiatives
- Increased access to free, up to date, good quality resources and training materials through local lending points
- Advice, information and signposting on smoking prevention, stop smoking services and tobacco-related issues
- Support, information and advice for organisations and groups to develop their own smoking policies and initiatives. YSTEP’s Policy Toolkit is included in this CD Rom.
- Information, training, support and resources enabling those working with young people to develop learning activities meeting ‘Curriculum for Excellence’ outcomes across subject areas.

Lesson plans and activities on this CD Rom have been developed in dialogue and consultation with Mid and East Lothian Drug and Alcohol Partnership Substance Misuse Education Subgroup and staff from schools and youth organizations across the Lothians, including Canongate Youth Project, the Citadel, the Royal High School, Firhill High School, Queensferry Community High School, Forthview and Pentland Primary Schools. We hope it will be of practical use to you in offering young people accurate information with which to make positive, informed choices about their health and well-being.

“Thank you so much for all the input you have given to us. The staff, as well as the pupils, have benefited greatly and it is intended that we will share the various sessions with all the PSE teachers so that everyone can deliver the lessons you gave at appropriate stages”
Janette Shearer, Royal High School Head of Guidance

**Successful Approaches to Smoking Prevention:**
In schools / youth work settings, social influence approaches which combine skills training (including refusal skills) ‘norm setting’ and factual information have had the best results.
Effective approaches for different age groups include:
- Primary school age: emphasis on how tobacco affects the body
- 11-13 years: emphasis on self-worth and assertiveness
- 13-15 years: effects of parental or peer smoking are significant. Focus on social / peer pressures / attitudes to smoke / starting smoking, reasons why people smoke, mental wellbeing eg how to deal with stress and problem solving
- 15-16 years: beliefs about positive psychological effects of smoking are stronger predictors of smoking intentions (than social or health consequences) – focus should be on individual’s subjective experience of smoking eg exploring self-identity, perceived benefits of smoking & alternatives

A concerted approach to learning about tobacco across the curriculum is likely to be more effective than a series of separate interventions.

Approaches are strengthened when combined with organisational tobacco/smoking policy and staff training.

In a 2011 study (Actions taken by schools when tobacco policies are violated: Associations with adolescent smoking prevalence, Wiium N, Wold B. Source: Department of Health Promotion and Development, Faculty of Psychology, University of Bergen, Norway) young people’s exposure to parents' and teachers' smoking, and teachers' support were associated with adolescent smoking prevalence, irrespective of actions taken by schools in response to violations of smoking policies.

Contents:

You will find activity plans, PowerPoint presentations, reference information and sources on this CD Rom grouped as follows:

- Attitudes, Values and Peer Pressure
  - Attitudes, Values and Peer Pressure Intro
  - CFE Advertising Presentation
  - P7 Social Norms
  - Social Norms session
  - Tobacco Industry and Media session
  - Lesson Plan - Media Influence
  - Lesson Plan - Memories of Tobacco

- Costs of Tobacco
  - Costs of Smoking- Power Point
  - Smoking and Debt
  - Costs to Smokers
  - Smoking Calculator x2
  - Cash to Ash- Duncan Bannatyne
  - Cost of Fires
  - British American Tobacco
  - Lesson Plan Costs of Tobacco
